

What is claimed is:

1. A method for providing a decorative cover for a floral grouping, comprising:

providing a sheet of material having a design indicia on at least one side thereof, the sheet of material having an opening extending therethrough;

disposing at least a portion of the floral grouping through the opening in the sheet of material; and

wrapping the sheet of material about the floral grouping to provide a decorative cover about the floral grouping wherein the design indicia of the sheet of material is visible in conjunction with the floral grouping.

2. The method of claim 1 further including connecting at least a portion of a card to a card holder assembly attached to the sheet of material.

3. The method for providing a decorative cover for a floral grouping of claim 1 wherein the sheet of material is provided with a substantially square-shaped configuration having four corners and wherein the four corners of the sheet of material are flared so as to extend a distance upwardly and outwardly

from the floral grouping when the sheet of material is wrapped about the floral grouping.

4. The method for providing a decorative cover for a floral grouping of claim 3 wherein the sheet of material is wrapped about the floral grouping so as to overlap portions of the sheet of material, and wherein the sheet of material is provided with a bonding material disposed on at least a portion of the sheet of material such that upon wrapping the sheet of material about the floral grouping to provide the decorative cover, at least a portion of the overlapping portions of the decorative cover are bonded via the bonding material.

5. The method for providing a decorative cover for a floral grouping of claim 4 wherein the sheet of material is further defined as being a substantially flat, flexible sheet of material.

6. The method for providing a decorative cover for a floral grouping of claim 5 wherein the sheet of material is constructed of a material selected from the group consisting of paper, metal, foil, polymeric film, cling wrap, cloth, burlap and/or combinations thereof.

7. The method for providing a decorative cover for a floral grouping of claim 6 wherein the sheet of material has a thickness in a range of from about 0.1 mil to about 30 mil.

8. The method for providing a decorative cover for a floral grouping of claim 1 wherein the sheet of material is wrapped about the floral grouping so as to overlap portions of the sheet of material, and wherein the sheet of material is provided with a bonding material disposed on at least a portion of the sheet of material such that upon wrapping the sheet of material about the floral grouping to provide the decorative cover, at least a portion of the overlapping portions of the decorative cover are bonded via the bonding material.

9. The method for providing a decorative cover for a floral grouping of claim 1 wherein the sheet of material is further defined as being a substantially flat, flexible sheet of material.

10. The method for providing a decorative cover for a floral grouping of claim 1 wherein the sheet of material is constructed of a material selected from the group consisting of paper, metal foil, polymeric film, cling wrap, cloth, burlap and/or combinations thereof.

11. The method for providing a decorative cover for a floral grouping of claim 1 wherein the sheet of material has a thickness in a range of from about 0.1 mil to about 30 mil.

12. The method for providing a decorative cover for a floral grouping of claim 1 wherein the sheet of material is wrapped about the floral grouping so as to overlap portions of the sheet of material, and wherein the sheet of material is provided with a substantially square-shaped configuration having four corners flared so as to extend a distance upwardly and outwardly from the floral grouping when the sheet of material is wrapped about the floral grouping.

13. The method for providing a decorative cover for a floral grouping of claim 12 wherein the sheet of material is further defined as being a substantially flat, flexible sheet of material.

14. The method for providing a decorative cover for a floral grouping of claim 13 wherein the sheet of material is constructed of a material selected from the group consisting of paper, metal foil, polymeric films, cling wrap, cloth, burlap and/or combinations thereof.

15. The method for providing a decorative cover for a floral grouping of claim 14 wherein the sheet of material has a thickness in a range of from about 0.1 mil to about 30 mil.
